Rating: Neutral

SAL Saudi Logistics Services (SAL)

Cargo volumes to normalize in 2025e; Reduce TP to SAR193/sh.

- Following a Red Sea disruption-driven surge in 2024, SAL's air cargo handling is likely to normalize in 2025e, with logistics business positioned for continued growth.
- We cut our top-line estimates by 18-21% on lower cargo volume and prices, and bottom-line estimates by 23% on lower margins for 2025-26e.
- Based on DCF and P/E valuation methods, we revise our TP to SAR193/sh. (SAR251 TP earlier), implying an upside of ~9% with a Neutral rating.

Cargo volume to normalize in 2025 before improving from 2026e: SAL's cargo volumes rose by 20% y/y in 2024 (31% y/y in 1Q24), primarily due to supply chain disruptions resulting from conflicts in the Red Sea. However, volume started normalizing from 2H24 (+26% y/y in 1H24; +15% y/y in 2H24), coinciding with the easing of these disruptions. Going forward, we anticipate a further normalization in volumes in 2025e, mainly driven by: i) easing supply chain disruptions, ii) recent quarterly volume trends and management indications, reflecting evolving market dynamics, and iii) heightened competitive pressure resulting in a lower market share (92% in 2024 vs 95% in 2023). Nonetheless, we expect cargo volume to improve from 2026e onwards (+9.6% CAGR over 2025-30e), aided by capacity expansion (from 850k tons currently to 1.8-2.0mn tons by 2027e) and healthy demand. Overall, we have revised our cargo volume forecast for SAL downwards, now projecting an 8.7% CAGR for 2024-28e (vs. +11.7% CAGR earlier). This, coupled with recent price concessions to key customers impacting blended air cargo revenue per ton, resulted in a downward revision of our air cargo revenue growth forecast. Accordingly, we expect air cargo revenue to grow at 8.1% CAGR for 2024-28e (vs. +11.9% CAGR earlier).

The logistics business is gearing up for future growth: We acknowledge the segment's strategic importance to the company's future revenue mix. The company is actively investing in its logistics and fulfillment capabilities to drive topline growth and diversification in the long term. This includes a 30-year land lease preliminary agreement (SAR16 per sqm of annual rent with annual inflation escalation of 1.5%) with Sela to develop, construct and operate a 1.56mn sqm logistics park in Falcon City with an estimated investment of SAR4bn. This project will roll out in phases, with the first phase, covering 700ksqm, set for completion in 2027e and the entire project expected to be finalized by 2031e.

However, as of now, we do not factor in these plans in our forecasts as well as valuation, given that these are still at the preliminary planning stage. These would act as upside risks to our estimates and valuation.

Currently, the overall logistics market is experiencing slower-than-anticipated growth with a gradual improvement in utilization (mainly fulfillment). Consequently, we expect the logistics segment revenue to grow at a 14.1% CAGR (~16.9% CAGR earlier) over 2024-28e, aided by expanding storage facilities, freight forwarding & supply chain solutions.

Change in estimates: Post downward revision in cargo volume forecasts, lower pricing, and slower than expected growth in the logistics segment, we cut our 2025-2026e top-line forecast by 18-21%. We also adjust our gross margin estimates downwards, reflecting a downward revision in the air cargo business revenue and a higher share of low-margin logistics business in the total revenue mix. We now expect our gross margins at 53.8% in 2025e (vs. 54.9% previously) and 54.4% in 2026e (vs. 54.6% previously). This, along with higher operating expenses due to ongoing investments in capabilities and brand presence, also led to a downward revision in our net profit estimate. Overall, we now expect earnings to grow at a CAGR of 6.9% over 2024-28e (vs. +11.8% CAGR earlier).

Source: Company data, GIB Capital

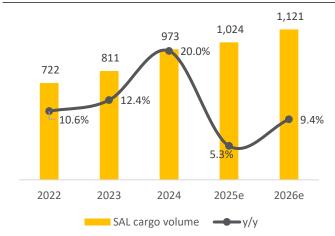

1Q25e preview: SAL's revenue is projected to decrease by 9.3% y/y to SAR410mn in 1Q25e. This anticipated decline is largely due to the strong 1Q24 performance, boosted by Red Sea crisis-related tailwinds. Lower air cargo volumes are expected to shift the revenue mix towards the logistics segment. Given the relatively fixed cost structure of the air cargo business, this revenue contraction will likely lead to gross margin compression, estimated at ~53% for 1Q25e, with an operating margin of ~40%. Consequently, we expect SAL's earnings to normalize in 1Q25e, with profit declining by 26.6% y/y to SAR153mn.

Valuation and risks: SAL's share price has declined by ~30% YTD, with the stock declining significantly since the announcement of 2024 results in early February 2025. The stock is currently trading at a 1-year forward P/E of 22x. We use an equal mix of DCF and P/E-based valuation methods for valuing the company. For relative valuation, we use a multiple of 23x on 2025e EPS, leading to a 1-year forward TP of SAR198/share. In our DCF analysis, using a WACC of 9.6%, we arrive at a 1-year forward TP of SAR187/share. By averaging both approaches, we derive a blended TP of SAR193/share (SAR251 TP earlier), indicating ~9% upside potential and a Neutral rating. Downside risks include global recession, slower-than-expected growth in cargo volumes, weaker-than-expected prices, heightened competition, delay in expansion plans, early termination or non-renewal of contracts, and geopolitical risks.

Disclaimer

This research report has been prepared by GIB Capital, Riyadh, Saudi Arabia. It has been prepared for the general use of GIB Capital's clients and may not be altered, redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of GIB Capital. Receipt and review of this research document constitute your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion, or information contained in this document prior to public disclosure of such information by GIB Capital. The information contained was obtained from various public sources believed to be reliable, but we do not guarantee its accuracy. GIB Capital makes no representations or warranties (express or implied) regarding the data and information provided and GIB Capital does not represent that the information content of this document is complete, or free from any error, not misleading, or fit for any particular purpose. This research document provides general information only. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other investment products related to such securities or investments. It is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of any specific person who may receive this document.

Investors should seek financial, legal or tax advice regarding the appropriateness of investing in any securities, other investment or investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Investors should note that income from such securities or other investments, if any, may fluctuate and that the price or value of such securities and investments may rise or fall. Fluctuations in exchange rates could have adverse effects on the value of or price of, or income derived from, certain investments. Accordingly, investors may receive back less than originally invested. GIB Capital or its officers (including research analysts) may have a financial interest in securities of the issuer(s) or related investments, including long or short positions in securities, warrants, futures, options, derivatives, or other financial instruments. GIB Capital may from time to time perform investment banking or other services for, solicit investment banking or other business from, any company mentioned in this research document. GIB Capital and employees, shall not be liable for any direct, indirect or consequential loss or damages that may arise, directly or indirectly, from any use of the information contained in this research document. Where the report contains or refers to a recommendation about a specific security or securities service, please note that it may not be suitable for all recipients. Please note that the achievement of any price target may be impeded by general market and economic trends and other external factors, or if a company's profits or operating performance exceed or fall short of our expectations. The subjectivity in future expectations is complex and may miss actual or reported numbers.

This research document and any recommendations contained are subject to change without prior notice. GIB Capital assumes no responsibility to update the information in this research document. This research document is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law, or which would subject GIB Capital to any registration or licensing requirement within such jurisdiction

The principal activities of GIB Capital are Dealing, Custody, Managing, Arranging and Advising pursuant to the Capital Market Authority ("CMA") License No. 07078-37.

We use a rating system based on potential upside, 1 year from today, based on our valuation models. For "Overweight" ratings, the estimated upside is >10%, for "Underweight", the estimated downside is <10%. For returns in between +/-10%, we have a Neutral rating.
